Bismuth is a comfortable and functional sweater, designed with an inner layer made from bamboo viscose to ensure optimal comfort throughout the day. The fabric offers moisture-wicking and temperature-regulating properties, helping to maintain a comfortable body temperature under varying working conditions. It also inhibits odor development, making it especially well-suited for long and demanding workdays.

The sweater features elastic zebra-style reflective stripes that preserve the fabric's natural flexibility while enhancing visibility. The black neck and sleeve bindings are strategically placed to provide a clean and functional finish.

Bamboo, as a raw material, is a more sustainable alternative compared to many conventional textile fibers—underscoring Bismuth's combination of comfort, performance, and environmental responsibility.

Technical description: Outer fabric: 95% polyester, 5% elastane. Inner fabric: 100% bamboo viscose. EN ISO 20471:2013+A1:2016 Class 2. 260 g/m².

Wash the garment in the machine at 40 degrees. Do not iron, tumble dry, dry clean or bleach.
